BFF is a fantasy sport game specifically designed for the Jupiler Pro League released in 2017. The project was initiated at Le Wagon Brussels. I am looking for a ruby on rails developer to rebuild the application to a professional, playable standard.

# The Mission

**Refactor codebase** to make it rock solid reliable

**Integrate new API** (from sportmonks.com to sportradar.com)

**Manage Heroku Postgres** database (20k users ready)

Improve existing features:
- ➢ **Transfers** (+ Wildcard)
- ➢ Public and Private **Leagues** system
- ➢ **User interface**

Build new features:
- ➢ **Live statistics updates** + Push notifications (based on the API)
- ➢ **Players' price fluctuation** system based on popularity
- ➢ **Automated mailing system**

Add **Advertising inserts** for targeted advertisements

**Keep Frontend responsive** for laptops and smartphones

# Return:
## Equity
## or
## Freelance contract
